Summary

CS undergraduate at COMSATS University Islamabad with practical experience in full-stack web development, Python scripting, and web scraping/automation. Comfortable across frontend, backend, and database layers with a focus on writing clean, structured code.

Education

COMSATS University Islamabad, Lahore Campus Feb 2024 – Present
B.S. Computer Science — CGPA: 3.29/4.0 *Lahore, Pakistan*

- Relevant Coursework: Data Structures & Algorithms, OOP, Database Systems, Web Technologies, AI, Operating Systems

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, C, Java, SQL, HTML5, CSS3
Frameworks: React.js, Node.js, Express.js, Flask, Streamlit, TailwindCSS, Bootstrap
Databases: MongoDB, MySQL, PostgreSQL, Microsoft SQL Server
Tools & Other: Git, REST APIs, Jira, Click Up, Project Management, Web Scraping (BeautifulSoup, Selenium, Playwright), Redis, PyMongo, OOP

Experience

Full-Stack Intern Jul 2026 – Aug 2026
Sanestix *Remote*

- Built the Python scraper engine for a multi-source lead-generation platform (Data Intelligence Platform), developing modular scrapers (LinkedIn, Google Maps, Website, Facebook, Instagram) with Playwright, Selenium, and BeautifulSoup.
- Designed a standardized output envelope and per-scraper result schema for consistent, null-safe fields across all modules.
- Built a Redis-based worker (BRPOP queue consumer) that decouples the Python engine from the Node.js backend via plain JSON, avoiding queue-framework lock-in (BullMQ vs. Celery/RQ).
- Integrated with MongoDB (PyMongo) to track job status and persist scraped results, coordinating a cross-language API contract with the backend engineer.
- Contributed to authentication, tenancy security, and secrets management, and resolved production bugs on Sanestix Flow.
- Applied project management practices and used Jira to track, prioritize, and resolve bugs/tickets throughout the sprint cycle.

Volunteer Intern Jun 2026 – Aug 2026
Alkhidmat Foundation Pakistan – Volunteer Management Department *Lahore, Pakistan*

- Completed structured weekly training in disaster response, including First Aid, basic life support and fire-fighting orientation.
- Contributed to the GEN Z Entrepreneurship Initiative (Future Entrepreneurs Mapping Challenge) by surveying 10 students and recent graduates in Lahore on entrepreneurship interest, challenges, and training needs.
- Analyzed responses to identify promising startup ideas (freelancing 70%, tech/app-based 60%) and key barriers (funding 60%), and compiled findings and recommendations into a report.
- Created and published an entrepreneurship awareness post on Instagram and LinkedIn using the campaign hashtags.
- Received an Achievement Award for completing the Alkhidmat Summer Internship Program 2026.

Ambassador Feb 2026 – Jun 2026
LoopLab *Lahore, Pakistan*

- Selected to represent LoopLab and support the growth of a tech-driven community centered on immersive virtual experiences through Loopverse 2.0.
- Led outreach campaigns, participated in strategy discussions, and connected students with innovation-focused opportunities.
- Strengthened leadership, communication, and teamwork skills in a dynamic digital environment.

SEO Intern Feb 2025 – May 2025
Mind Canvas *Lahore, Pakistan*

- Assisted with tasks related to improving website search engine rankings and overall online presence.
- Contributed to keyword research, on-page optimization, meta tag writing, and content optimization to improve search engine ranking.
- Participated in website audits, analyzed website performance, and provided recommendations for improvement.
- Tracked keyword rankings and analyzed website analytics to measure SEO performance.

Python Developer Intern Jul 2024 – Aug 2024
Ilm O Irfan Technologies *Lahore, Pakistan*

- Completed structured Python training covering data structures and OOP; delivered a Movie Recommendation System and a Hangman Game as internship projects.

Projects

Auto Care E-Commerce Store | *MERN Stack, TailwindCSS* Jun 2026

- Full-stack e-commerce platform for auto spare parts with product catalogue, search and filtering, shopping cart, and order management.
- RESTful API built with Express.js/Node.js; MongoDB for persistence; React.js frontend with a role-based admin dashboard.

Bill Buddy AI | *TypeScript, Flask, AI APIs* Apr 2026

- Hackathon project that parses Pakistani electricity, gas, and water bills and explains them in plain Urdu/English with cost-saving suggestions.

AI Scholarship Finder | *Python, Flask, Streamlit, BeautifulSoup, Pandas* 2025

- Aggregates scholarship opportunities from multiple sources and ranks them using a multi-factor matching algorithm (country, degree, GPA, funding type).
- Includes an analytics dashboard and Excel export. Live demo available.

Mobile Accessory Hub — Inventory & POS | *Python, PySide6, SQL Server, bcrypt* 2025

- Desktop POS system with real-time stock tracking, role-based access, automated sales reporting, and secure login via the Repository Pattern.

Bank Management System | *C++, OOP, Data Structures* 2025

- Console banking application using Stack, Queue, and Doubly Linked List for account management, transactions, and loan handling with file-based persistence.

Certifications & Recognition

Certifications: Meta Front-End Developer, Meta Database Engineer, Meta Web Dev Fundamentals, Google Developers Bootcamp
Awards: Achievement Award — Alkhidmat Summer Internship 2026; Outstanding Contribution — Capture Crew & 404 Squad; Certificate of Appreciation — OPPO x COMSATS; Hackathon '26; SkillUp Week 2025; Lahore Marathon 2026
Publication: Cloud Health Revolution — article on cloud technologies in healthcare
